Bindomatic covers

You never get a second chance to make a first impression

There is a saying that 'an audience takes four seconds to judge a speaker'. The opportunity to make a first impression will never come again. So, if you have put your heart and soul into a project, an important presentation, for example, here is an invaluable tip: Put a little effort into making an entrance as well.

Creating a professional impression is easy, and at Bindomatic, we give you two choices in your approach. Standard covers or customised ones to reflect your corporate logotype and colours – choose the best one for you, whatever the situation.

Technical data: Bindomatic covers

BINDING: Durable glue strip, specially designed by Bindomatic

SPINE WIDTHS: (A4) Spine widths from 1.5-54mm

NUMBER OF SHEETS PER COVER: Between 1 and 540

Other sizes and spine widths as required

BINDOMATIC®
A professional impression.

BINDOMATIC

A PROFESSIONAL IMPRESSION

Fed up with unwieldy ring binders, stapled documents or clumsy wirebound books?

The Bindomatic Document Finishing systems will give you a sleek, flat professional binding with many attractive options.

Presentation

They say "Don't judge the book by its cover" but everybody does.

The Bindomatic Binding System leaves you to concentrate on the content and after all, that is your expertise, isn't it?

Convenience

Your Bindomatic system is always ready to use and don't need any setup or special preparations to do its job.

Just insert your freshly printed document into a Bindomatic cover, put it in the machine, wait for the beep and it is done.

The Bindomatic process is free of mess, and is quick and easy for your operators to use. Punch-binding is a much slower process which creates paper waste as a result of the punching operation.

Accuracy

Here are some of the reasons why Bindomatic covers are so strong.

1. The thickness of the solid adhesive is uniform the entire length of the spine and the cover is scored four times.
2. The longitudinal edges of the adhesive are attached to the cover ensuring that all papers melt into the adhesive.
3. Our covers are the first pre-folded thermal covers in the world. The covers are folded back on themselves during the production process so that the bound document hinges open the first time on the outer scoring line.
4. Use of 100% Cotton Bookbinding cloth. Laminated with the adhesive, on the top of the strip. During the binding process, the cloth reinforcement flows into the adhesive. After cooling, the cloth, the adhesive, and the cover stock fuse together to form a superior spine.
5. The new scoring method produces a sharper, bookline spine that improves the appearance of the bound document.
6. During the binding process, the cover "squeeze" the paper at the outer scoring lines which further improves the appearance of the bound document.

Speed

It takes only about 60 seconds to bind one or several documents on a Bindomatic thermal binding system, regardless of the thickness of the document! In contrast, a 'punch-bound' document must first be punched in sections small enough to fit into the punch machine, then manually fed onto a plastic or wire comb. The thicker the document, the more time it takes to bind. In addition, thermal binding allows several documents to be bound simultaneously, thereby making a dramatic saving in staff time and cost. Again in contrast, punch-binding is a labour intensive operation where each document has to be bound individually, thereby dramatically increasing staff time and cost.

Bindomatic 1000

The Bindomatic 1000 is a compact desktop unit designed for individual users with modest document volumes. The 1000 binds documents up to 120 sheets (12 mm). Up to three small documents can be bound simultaneously. Small, but very productive, the economical 1000 will out produce tabletop punch and bind systems costing hundreds more.

It is designed for the Small Office / Home Office / School Office user while also being an ideal tool for the Principal's desktop. It is so inexpensive, it can be used instead of your stapler for multipage documents.

Very small and easy to use

The Bindomatic 1000 has an extremely small footprint - only 376 x 104mm - which means you can always have it near you.

Place 1 to 5 documents in the binder and press a button. Your documents are ready in a little more than a minute and the binder shuts off automatically - it couldn't be easier.

Very flexible

You can bind covers from 1.5mm to 12mm (1-120 sheets) and you can use transparent/white or coloured Bindomatic covers. A built-in cover size selector helps you select the correct size.

Bindomatic 5000

Bindomatic 5000 is the "Standard in Document Binding"

It suits all users from the smallest office to the largest. It can bind anything from 1 to 540 sheets of 80 gsm paper. And it will do 1 book at a time or up to 20 books in one single binding cycle.

School offices will use it for all their binding needs, producing policies, BOT reports or manuals. It can easily look after their archiving needs at the same time, e.g. binding each months invoice copies in a single folder.

School offices / Government bodies can either place it in their in-house copy centre or use it as a departmental document finisher.

Copy shops / Digital printers will use it to produce clients' documents.

Bindomatic 5000

As you can see the award winning design of the Bindomatic blends into the office environment perfectly. When you combine the quality documentation that modern laser printers and photocopiers provide with the professional binding of the Bindomatic System you have the means to present your product and services in the most professional way possible.

Bindomatic 5000 is what we call "our standard machine" because it can look after the binding need of any size office. It is the most versatile and can bind anything from A5 to A3, 1 - 540 sheets (1080 Pages).

A BIG advantage with the Bindomatic Document Finishing Systems is that you can easily add, remove or replace pages at any time. (Some limitations apply.) Have a look under "Why use Bindomatic" to learn more about this feature.

Creating a professional impression is easy!

① Place the set of paper in the automatic cover size selector. The display will indicate a suitable spine width.

② Put the set of paper in your chosen Bindomatic cover.

③ Place one or several documents in the document binder as soon as the green light goes on.

④ Remove the ready-bound document from the tray.

⑤ Congratulations – you have produced a professionally bound document in an instant!

Free-standing cooling rack and user instruction included. 3 Year warranty

Want a Window?

Any cover with a card front (not a transparent PET cover) can be supplied with a cut-out so that a heading may show through from the first bound page, as shown here.

The standard (and free) cut-out is 10cm by 5cm, and centred about 1/3 the way down the page.

Alternative custom cut-outs are also available, but incur an additional cost for making up the puncher template.

Portrait or Landscape?

Covers may be supplied in Portrait or Landscape formats, your choice.

There is no difference in cost.

Bindomatic Starter Packs

Our business idea is to provide companies and organisations with the simplest and most effective way of presenting their documents in a professional manner. We achieve this by designing and producing easy-to-operate document binding systems for offices, computer and reproduction centres, printers etc. Our business is based on the premise that it is natural to use a Bindomatic wherever documents are produced with the aid of a copier or laser printer. Bindomatic is currently used in more than 40 countries.

Bindomatic System is manufactured in Sweden.

Bindomatic 1000 start pack

This Start pack consists of 1 Bindomatic 1000 and 1 Small Start pack of covers (80 covers that will bind from 1 - 120 pages)

The Cover Start pack consists of 80 portrait covers clear front white back.

1.5mm Spine size, 1-15 pages per cover (Total :20)

3mm Spine size, 15-30 pages per cover (Total :20)

6mm Spine size, 30-60 pages per cover (Total :20)

9mm Spine size, 60-90 pages per cover (Total :10)

12mm Spine size, 90-120 pages per cover (Total :10)

Bindomatic 5000 start pack

This Start pack consists of 1 Bindomatic 5000 and 1 Standard Start pack of covers (180 covers that will bind from 1 - 120 pages)

The Cover Start pack consists of 180 portrait covers clear front white back.

Ambassador Hard Covers

Hard cover books always demand more attention. Imagine being able to create your own hard cover (case bound) book in no time at all and in any quantity you want.

Available as **Plain, Window or POD Label front**. (see samples above), or as Plain but with gold or silver leaf lettering/logo on front (your design).

Front

The Ambassador cover can be supplied as a Print On Demand cover, as shown above. Print On Demand means that there is an embossed area on the front where a printed label will sit. Sounds simple but looks very impressive as it will personalise your presentation. On request, various colours, sizes and fronts can be ordered. Please contact us for more information.

Spine

Each mm spine holds 10 pages (80 gsm paper). For example a 12 mm spine binds up to 120 sheets (240 pages) and can be used for 30 sheets less. See chart.

Size

Covers size is A4 but can be also be ordered in A5 or A3 size with a slightly longer delivery time. Please contact us to find out more.

Ambassador portrait A4 covers in Black or Blue Leather: SPINE WIDTHS 3 mm to 36 mm (3mm increments)

Ambassador landscape A4 covers in Black or Blue Leather : WIDTHS 3 mm to 36 mm (3mm increments)

Ambassador landscape A5 covers in Black or Blue Leather : WIDTHS 3 mm to 36 mm (3mm increments)

White Chromocard

Classic White Card

Conservative, Sophisticated, this cover will suit any presentation.

The standard inexpensive cover in white gloss card back and spine, with a PET clear (transparent) front cover in high gloss or matt finish.

Crocodile Covers

Crocodile Covers

Used for invoice, delivery docket, receipt or similar books when a hard wearing finish is needed.

Front

Front and back are made in a very thick Crocodile board with a lighter (better bendable) board on the spine.

Spine

Each mm spine holds 10 pages (80 gsm paper). For example a 12 mm spine binds up to 120 sheets (240 pages) and can be used for 30 sheets less.

Size

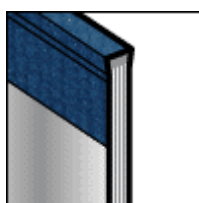

Covers can be made in any custom size from A5 to A3 size.

Colour

See colours below for this board type.

Leather

Leather Board

Aggressive, to the point, these covers make a statement. Yet stylish in their leather look.

Front

Choose either a PVC front or Solid for full wrap-around board.

Spine

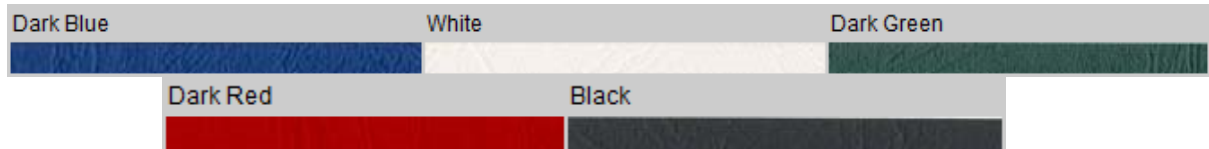

Each mm spine holds 10 pages (80 gsm paper). For example a 12 mm spine binds up to 120 sheets (240 pages) and can be used for 30 sheets less. See chart.

Size

Covers can be made in any custom size from A5 to A3 size.

Colour

See colours below for this board type.

Linen

Linen Board

A fresh crisp way of displaying your documents in a linen texture board.

Front

Choose either a PVC front or Solid for full wrap-around board.

Spine

Each mm spine holds 10 pages (80 gsm paper). For example a 12 mm spine binds up to 120 sheets (240 pages) and can be used for 30 sheets less.

Size

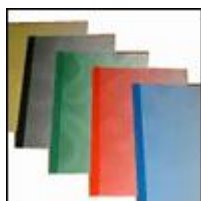

Covers can be made in any custom size from A5 to A3 size.

Colour

See colours below for this board type.

High Gloss Colour

Bright, Cheerful and Colourful, these folders instantly stand out and say: Look at me!

Colour matched front sheets delivered free with covers.

Front

Choose either a PVC front or Solid for full wrap-around board.

Spine

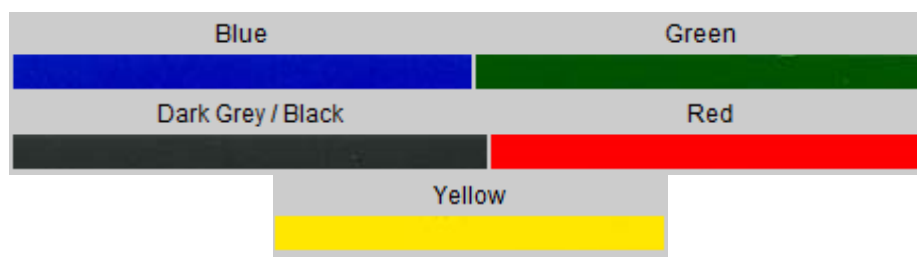

Each mm spine holds 10 pages (80 gsm paper). For example a 12 mm spine binds up to 120 sheets (240 pages) and can be used for 30 sheets less. See chart.

Size

Covers can be made in any custom size from A5 to A3 size.

Colour

Print on Demand (POD)

Print-On-Demand (Print-Your-Own Cover – Front and/or Back)

For the Personal presentation of Exclusive information - there is now the unique Bindomatic Print-On-Demand (POD) cover solution.

You can print Your own creation/design on the POD cover using a regular digital colour printer. You will produce a one-of-a-kind, personalised, perfect bound document with "paperback book" quality and high gloss appearance - made in the exact number of copies - nothing more, nothing less - and all created in just minutes!

Processed in-house, on-demand and in real-time.

These are all true and valid components of the Bindomatic POD cover trademark - Creativity Control and A Professional Impression combined!

POD covers are supplied with the glue strips separate, ready to apply AFTER the cover has been printed so your laser printer won't get gummed up in the heat.

Please note that for A4 POD covers, an A3 printer is required.

3 simple steps to create paperback books on demand.

Plain cover with glue

Printed cover with glue attached

Finished bound book

POD covers come in white with gloss or matt finish. Alternatively, send us your design and we can print them for you in any quantity.

Covers can be made in any custom size from A5 to A3 size, and 200 gsm or 250 gsm weights.

Please check your printer can handle 250 gsm card before ordering this weight.

SPINE SIZE CHART: applies to all covers

Number of sheets are based on using 80 gsm paper. If you use a better quality paper, for example 100 gsm white laser paper, then the page count will be less than shown.

Spine in mm	Sheets: 80 gsm
1.5	1-15
3	15-30
6	30-60
9	60-90
12	90-120
15	120-150
18	150-180
21	180-210
24	210-240
27	240-270
30	270-300
36	300-360
42	360-420
48	420-480
54	480-540
